

Recreation and Socioeconomic Work Group

Geographic Reaches for Purposes of Resource Action Discussions

1. **Diversion Pool-** The water body located below Oroville Dam to and including the Diversion Pool Dam and associated lands within the project 2100 Boundary, on either side of the Diversion Pool (i.e. Burma Road area on the north, Lakeland Blvd. access and trail alignment on the south).
2. **Low Flow Section-** The section of the Feather River immediately downstream of the Diversion Dam, past and including the Fish Barrier Dam and Pool, to the Thermalito Afterbay Outlet, including any lands on either side of the FR, within and adjacent to the Project 2100 Boundary.
3. **Oroville Wildlife Area-** The area within the Project Boundary designated and managed as a State Wildlife Area by DFG. Though the Thermalito Afterbay is officially included in the OWA, it is discussed separately, below.
4. **Thermalito Afterbay-** The surface and shoreline of the reservoir known as the Thermalito Afterbay and associated recreational facilities currently managed by DWR. The Clay Pit SVRA and Rabe Road Shooting Area are also included in this geographic area, for planning purposes, though the SVRA is not within the Project 2100 Boundary.
5. **Thermalito Forebay-** The surface and shoreline of the reservoir known as the Thermalito Forebay and associated recreational facilities currently managed by DPR, and all Project 2100 lands surrounding this reservoir.
6. **Oroville Reservoir-** All lands and recreational facilities within the reservoir and up to the high water mark of the reservoir and associated existing facilities and lands of the LOSRA, including Loafer Creek Unit, Bidwell Canyon Unit, Lime Saddle Unit, Spillway Unit, all boat-in campgrounds, and all unstaffed access points (such as Foreman Creek, Craig Access, Enterprise, and several other areas).
7. **Upstream Tributaries-** The Project 2100 lands within the canyons of the major tributaries (including the West Branch, North Fork, Middle Fork, and South Fork Feather River), upstream and uphill from the high water point of Oroville Reservoir to the surrounding Project 2100 Boundaries.
8. **Feather River below Thermalito Outlet-** The stretch of the Feather River, including both banks, immediately below the Thermalito Afterbay Outlet to the confluence of the Yuba River. (Most of this area is outside the Project 2100 Boundary).
